

A More vertical context

Ten typical CIM designs · identical scale per decade · $\rho = \tau$ at 45°

Paired reference estimates in MB/s. Gain-cell includes refresh; 3D FeFET denotes the 2026 vertical AND design.

B Whole-decade crop

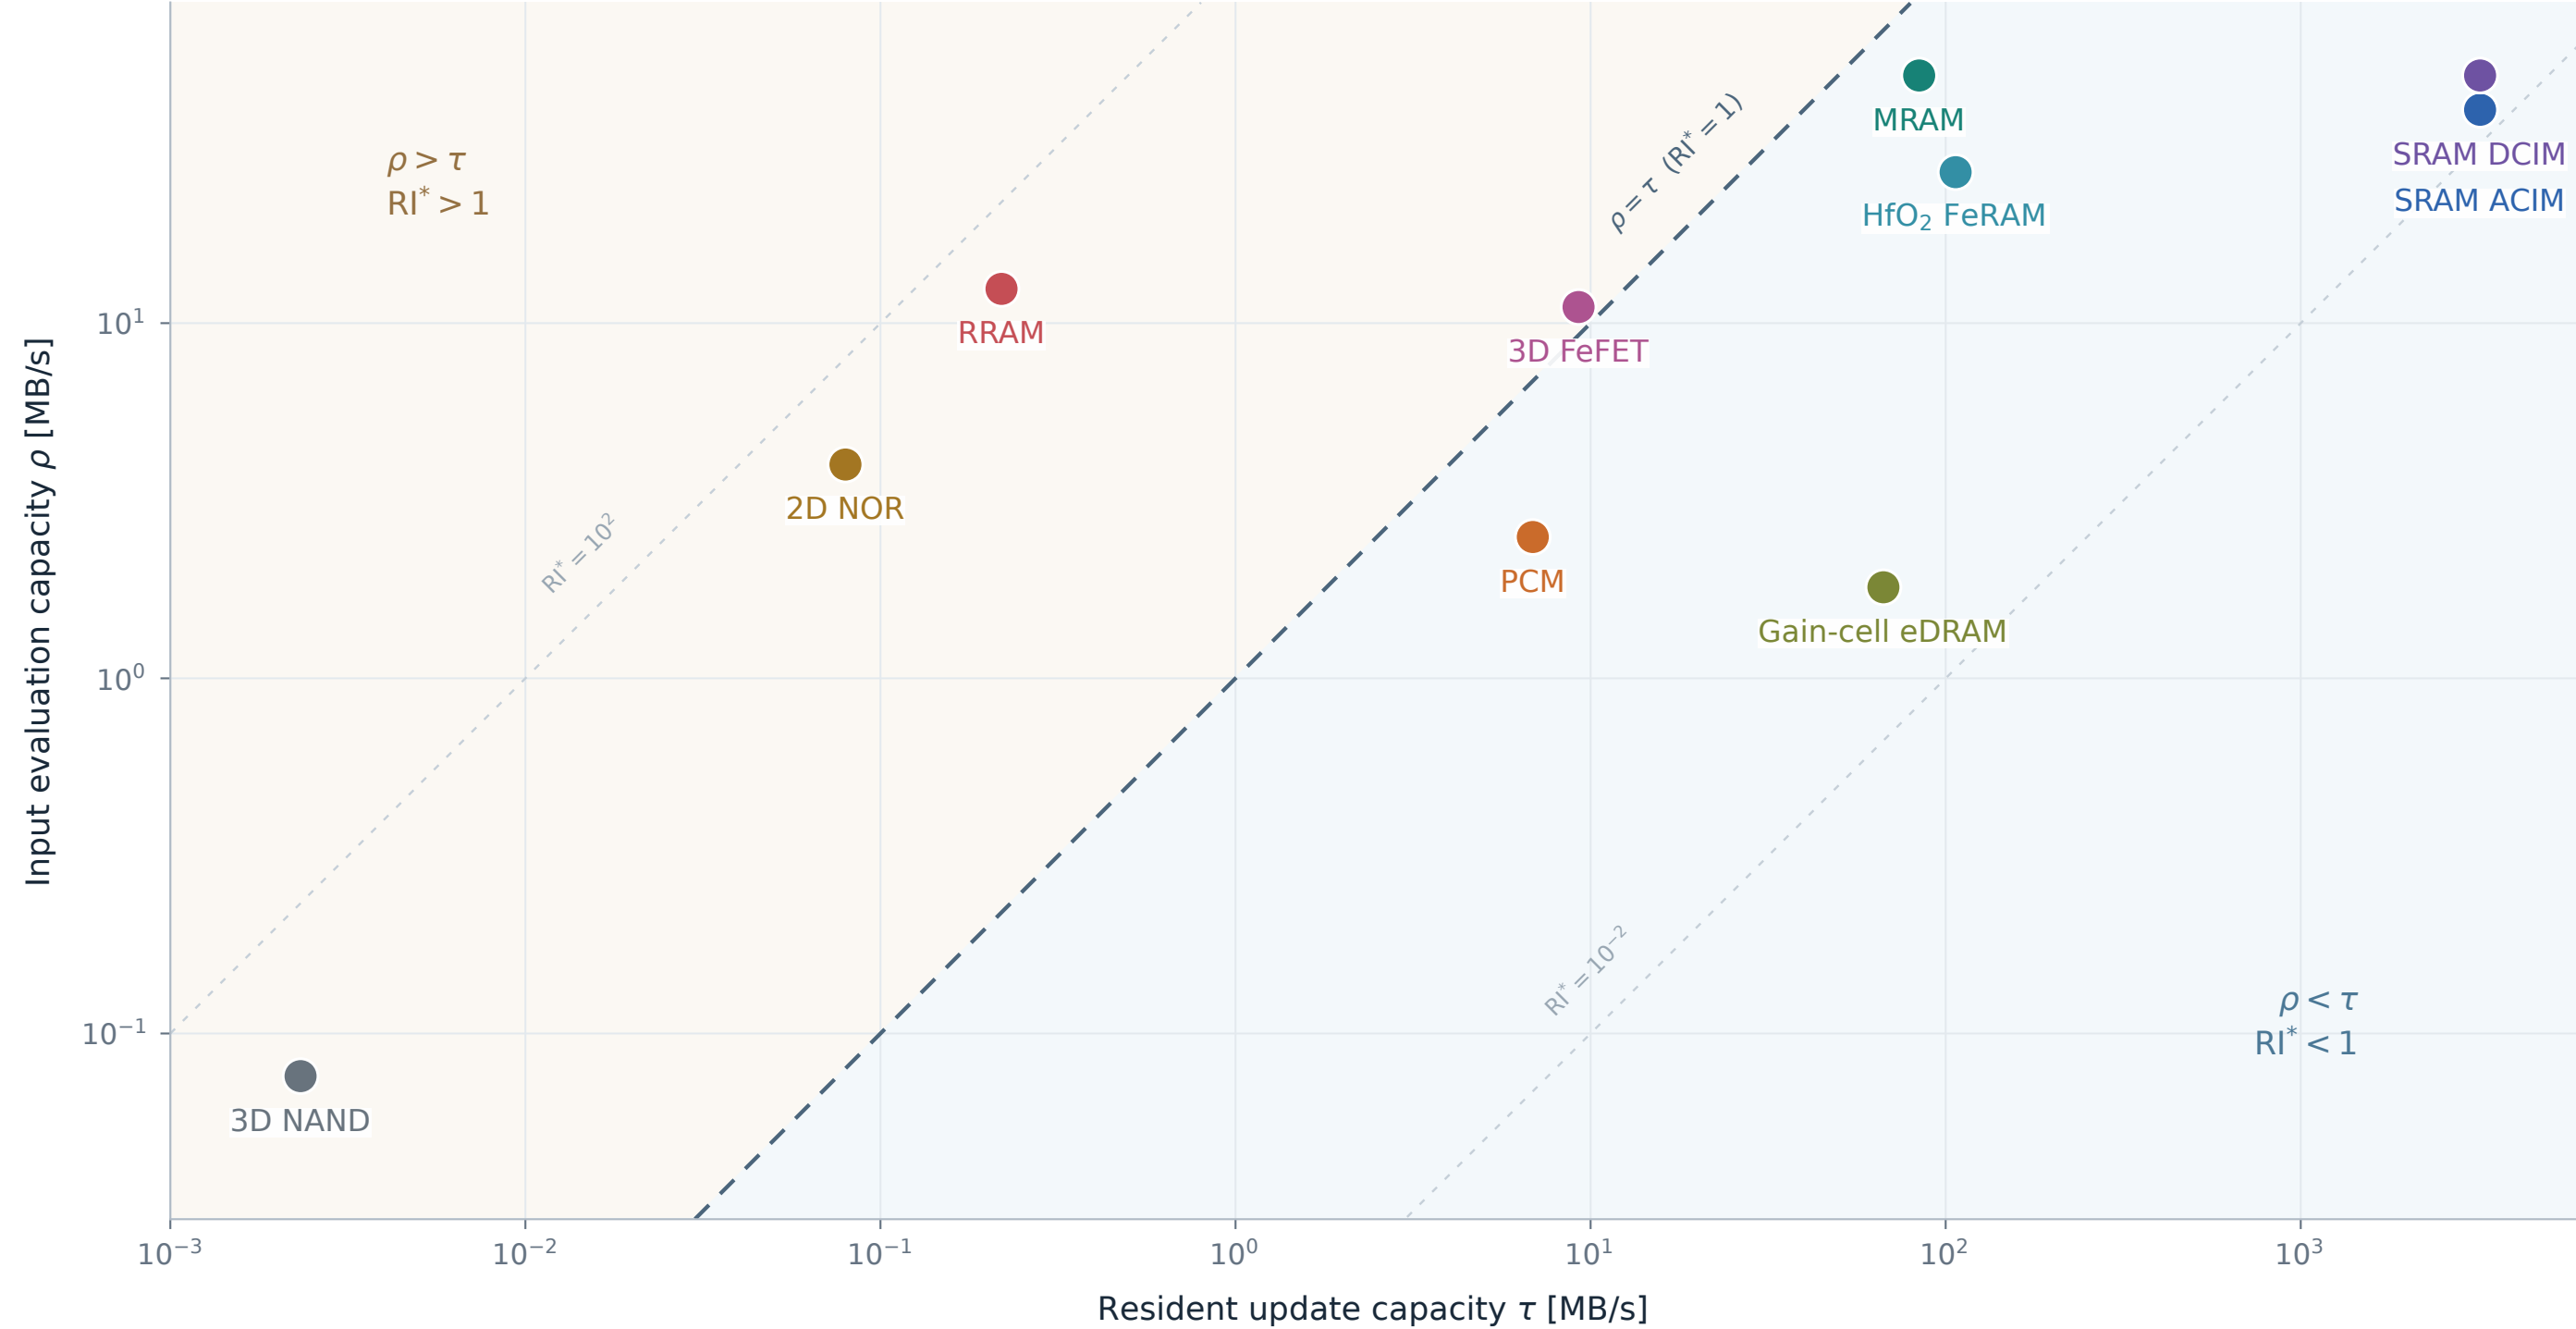

Ten typical CIM designs · identical scale per decade · $\rho = \tau$ at 45°

Paired reference estimates in MB/s. Gain-cell includes refresh; 3D FeFET denotes the 2026 vertical AND design.

C Compact crop

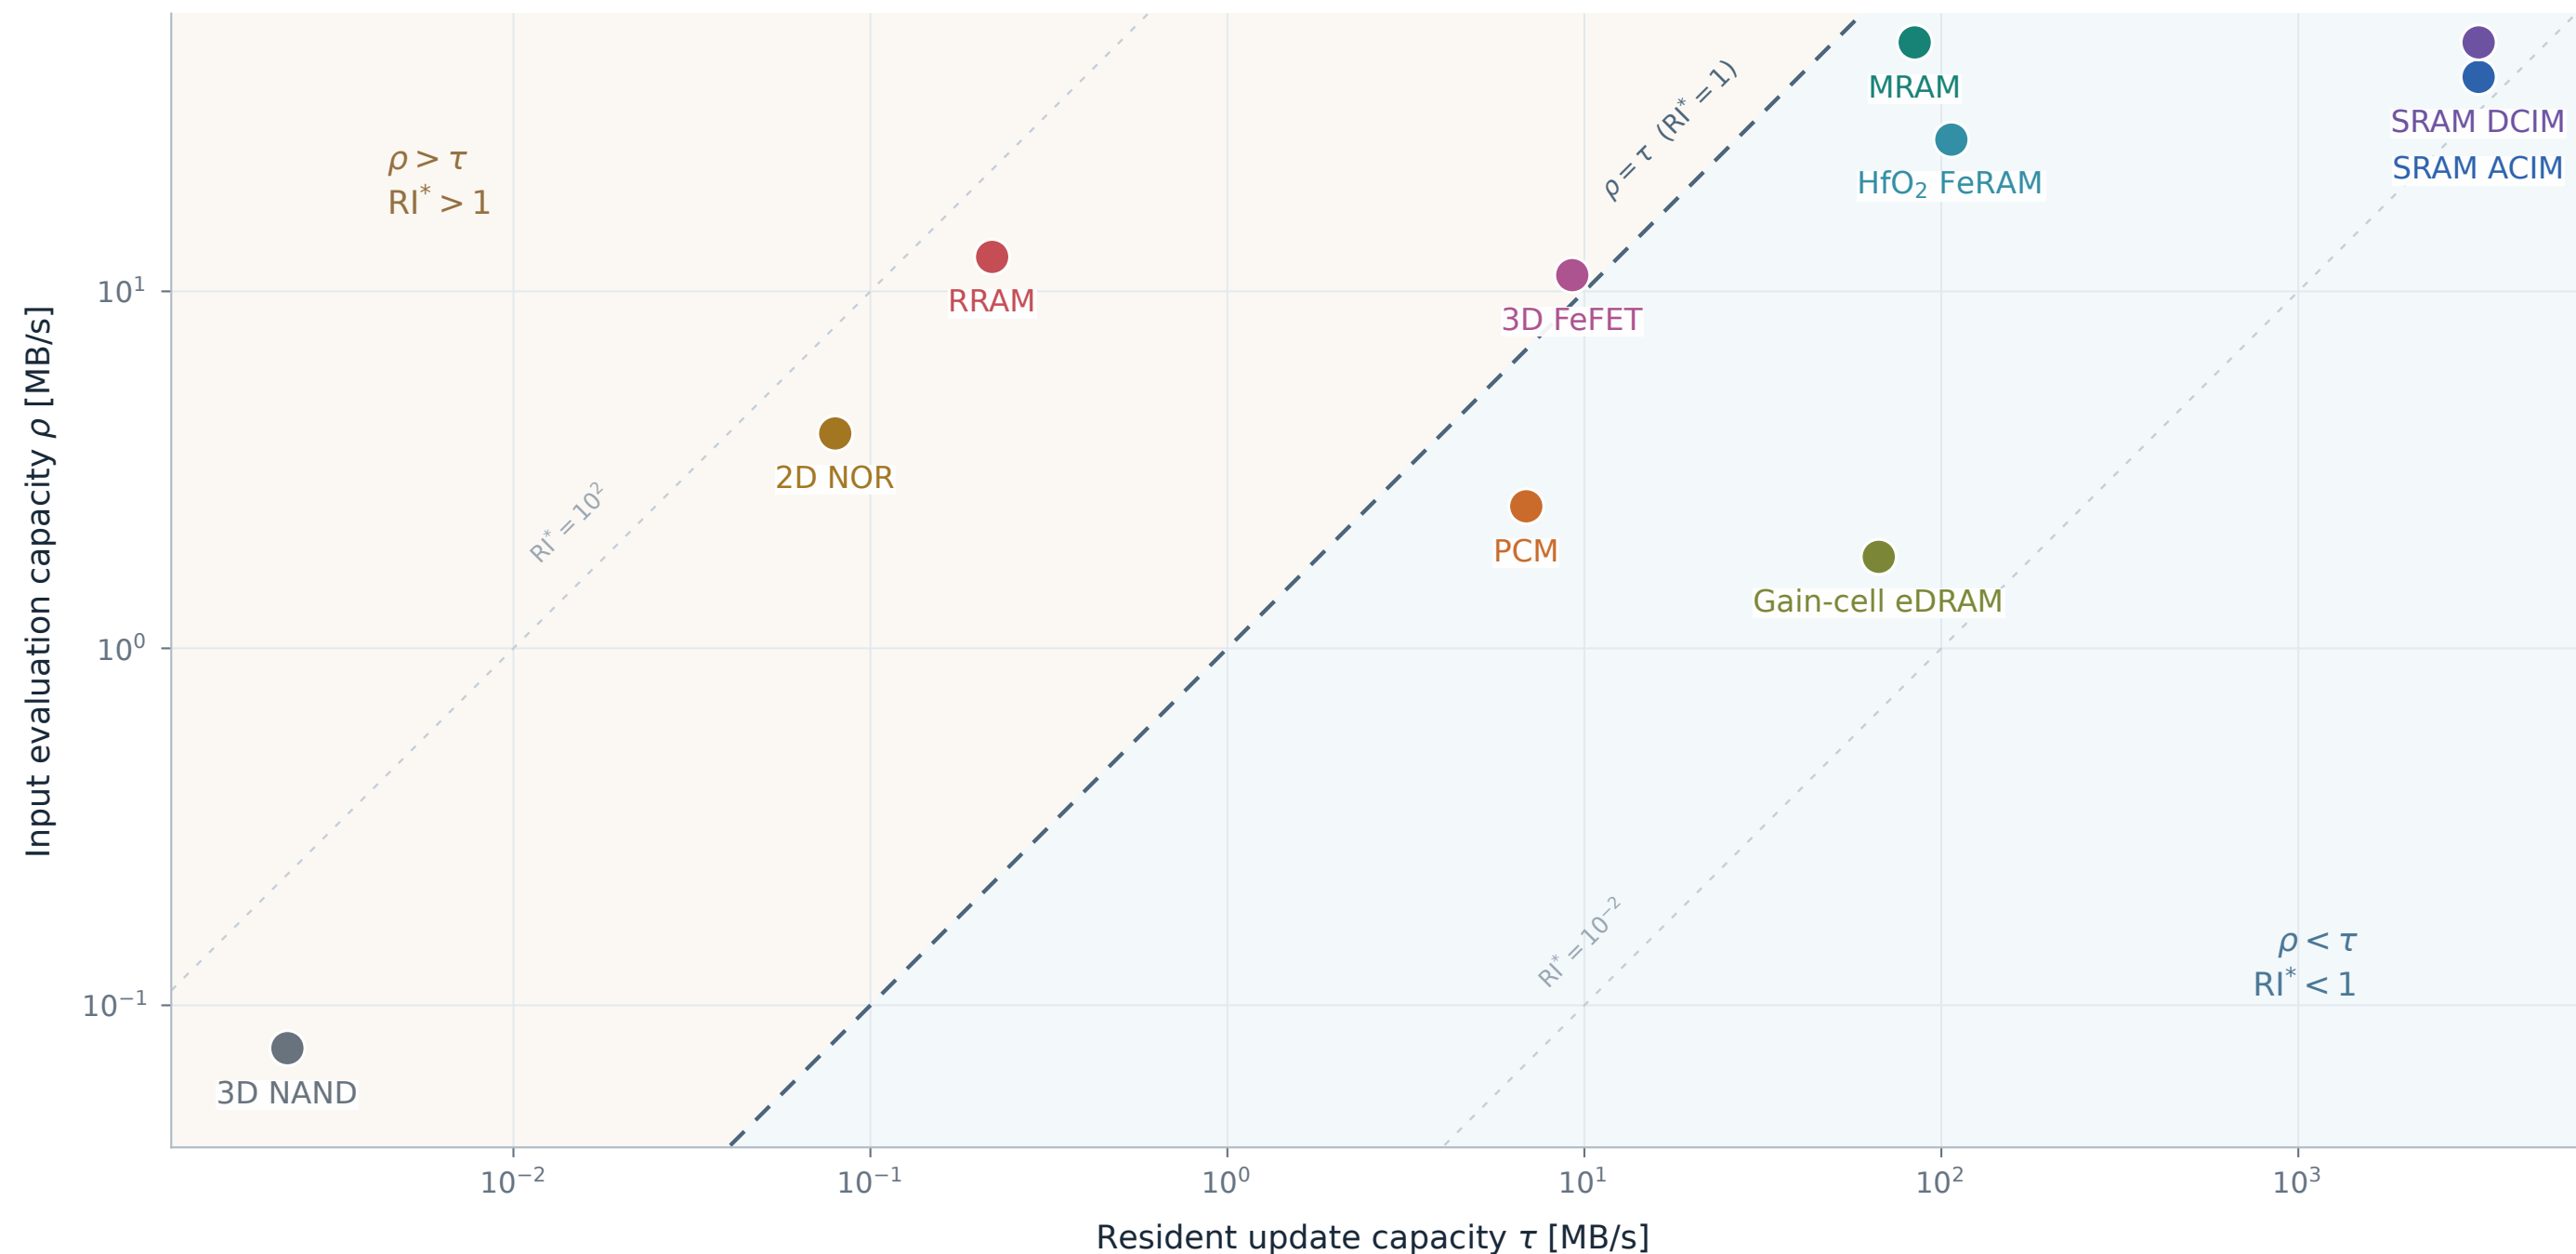

Ten typical CIM designs · identical scale per decade · $\rho = \tau$ at 45°

Paired reference estimates in MB/s. Gain-cell includes refresh; 3D FeFET denotes the 2026 vertical AND design.

D Close to the edges

Ten typical CIM designs · identical scale per decade · $\rho = \tau$ at 45°

Paired reference estimates in MB/s. Gain-cell includes refresh; 3D FeFET denotes the 2026 vertical AND design.
